

Stop Idling and Start Saving

ComfortPro™ auxiliary power features innovative DELTEK™ diesel-electric technology to cut your monthly fuel bills. It generates 4,000 watts of 120 VAC power to run your sleeper cooling, heating, and A/C accessories. Plus, it charges your battery, heats your engine block, and runs on shore power.

See Carrier Transicold South for all your auxiliary power and transport refrigeration needs.

And see how much you save.
